INTRODUCTION

The Quick Reference Guide for The North Carolina Standard Course of Study is intended to serve as a resource for teachers as they plan instruction to implement the North Carolina Standard Course of Study across multiple disciplines. There are nine Quick Reference Guides available – one for each of the grade levels from kindergarten through 8th grade. The inclusion of standards for all subject areas within single, grade-specific documents is intended to make planning for instruction more efficient and may be particularly useful for grade level teachers teaching multiple disciplines or teams of teachers collaborating to plan integrated instruction.

The Reference Guides contain the standards and objectives for all of the Common Core State Standards, North Carolina Essential Standards, and North Carolina Extended Content Standards. Additional information, such as introductory materials, or other narrative may be accessed by viewing the full version of the Standard Course of Study and Instructional Support Tools for each discipline.

The Reference Guide is organized into four major sections:

2. **North Carolina Essential Standards by Grade Level** – The North Carolina Essential Standards were written by teams of North Carolina Educators and are available by grade level for Arts Education (Dance, Music, Theatre Arts, Visual Arts), Healthful Living (Health and Physical Education), Information and Technology, Science, and Social Studies.

3. **North Carolina Essential Standards by Proficiency Level & Course** – The Essential Standards for English Language Development, Guidance, and World Languages (Classical, Dual & Heritage, and Modern) are organized by proficiency level rather than by grade level. A one page summary and standards for all proficiency levels are included for Guidance and World Languages. A one page summary and rubrics for proficiency placement are included for English Language Development. You will find a one page summary in the 6th-8th grade guides for Career and Technical Education, organized by Course.

4. **North Carolina Extended Content Standards** – These alternate achievement standards are designed for students with the most significant cognitive disabilities to have access to the Standard Course of Study at grade level. The North Carolina Extended Content Standards were developed for English Language Arts, Mathematics, Science, and Social Studies.

CRITICAL AREAS

1. **Representing, relating and operating on whole numbers, initially with sets of objects** – Students use numbers, including written numerals, to represent quantities and to solve quantitative problems, such as counting objects in a set; counting out a given number of objects; comparing sets or numerals; and modeling simple joining and separating situations with sets of objects, or eventually with equations such as $5 + 2 = 7$ and $7 – 2 = 5$. (Kindergarten students should see addition and subtraction equations, and student writing of equations in kindergarten is encouraged, but it is not required.) Students choose, combine, and apply effective strategies for answering quantitative questions, including quickly recognizing the cardinalities of small sets of objects, counting and producing sets of given sizes, counting the number of objects in combined sets, or counting the number of objects that remain in a set after some are taken away.

2. **Describing shapes and space** – Students describe their physical world using geometric ideas (e.g., shape, orientation, spatial relations) and vocabulary. They identify, name, and describe basic two-dimensional shapes, such as squares, triangles, circles, rectangles, and hexagons, presented in a variety of ways (e.g., with different sizes and orientations), as well as three-dimensional shapes such as cubes, cones, cylinders, and spheres. They use basic shapes and spatial reasoning to model objects in their environment and to construct more complex shapes.

MATHEMATICAL PRACTICES

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.

COUNTING AND CARDINALITY

**Know number names and the count sequence.**

- K.CC.1 Count to 100 by ones and by tens.
- K.CC.2 Count forward beginning from a given number within the known sequence (instead of having to begin at 1).
- K.CC.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0–20 (with 0 representing a count of no objects).

**Count to tell the number of objects.**

- K.CC.4 Understand the relationship between numbers and quantities; connect counting to cardinality.
  
  a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.
  
  b. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.
  
  c. Understand that each successive number name refers to a quantity that is one larger.
K.CC.5 Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.

**Compare numbers.**

K.CC.6 Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. (Note: Include groups with up to ten objects.)

K.CC.7 Compare two numbers between 1 and 10 presented as written numerals.

**OPERATIONS AND ALGEBRAIC THINKING**

*Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.*

K.OA.1 Represent addition and subtraction with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations. (Note: Drawings need not show details, but should show the mathematics in the problem – this applies wherever drawings are mentioned in the Standards.)

K.OA.2 Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.

K.OA.3 Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., 5 = 2 + 3 and 5 = 4 + 1).

K.OA.4 For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.

K.OA.5 Fluently add and subtract within 5.

**NUMBER AND OPERATIONS IN BASE TEN**

*Work with numbers 11 – 19 to gain foundations for place value.*

K.NBT.1 Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g., 18 = 10 +8); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.

**MEASUREMENT AND DATA**

*Describe and compare measurable attributes.*

K.MD.1 Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.

K.MD.2 Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter.

*Classify objects and count the number of objects in each category.*

K.MD.3 Classify objects into given categories; count the numbers of objects in each category and sort the categories by count. (Note: Limit category counts to be less than or equal to 10.)
GEOMETRY

Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).

K.G.1 Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to.

K.G.2 Correctly name shapes regardless of their orientations or overall size.

K.G.3 Identify shapes as two-dimensional (lying in a plane, “flat”) or three-dimensional (“solid”).

Analyze, compare, create, and compose shapes.

K.G.4 Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).

K.G.5 Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.

K.G.6 Compose simple shapes to form larger shapes. For example, “Can you join these two triangles with full sides touching to make a rectangle?”
