

UNIVERSITY of NORTH CAROLINA WILMINGTON

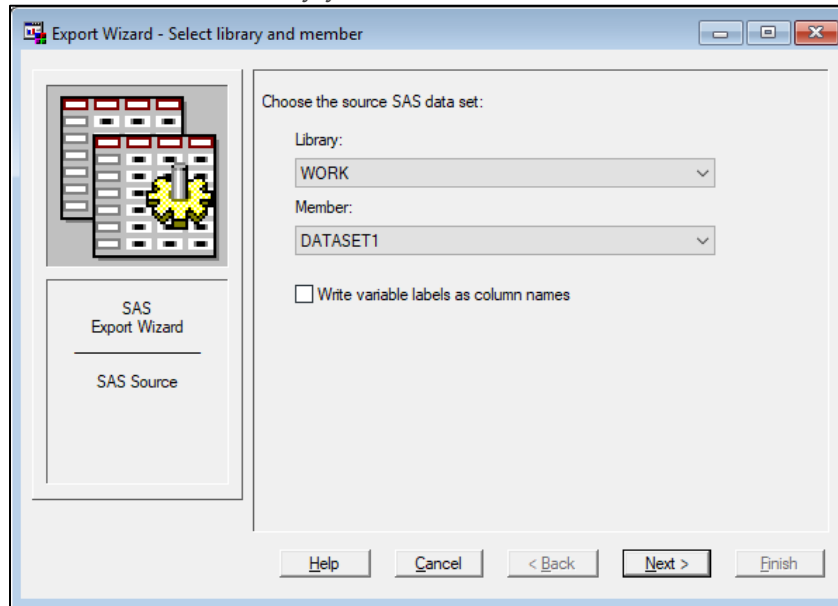

HOW EXPORT DATA FROM SAS

1. Using the Export Wizard

Under File select the option to Export Data, next follow the instructions in the export wizard.

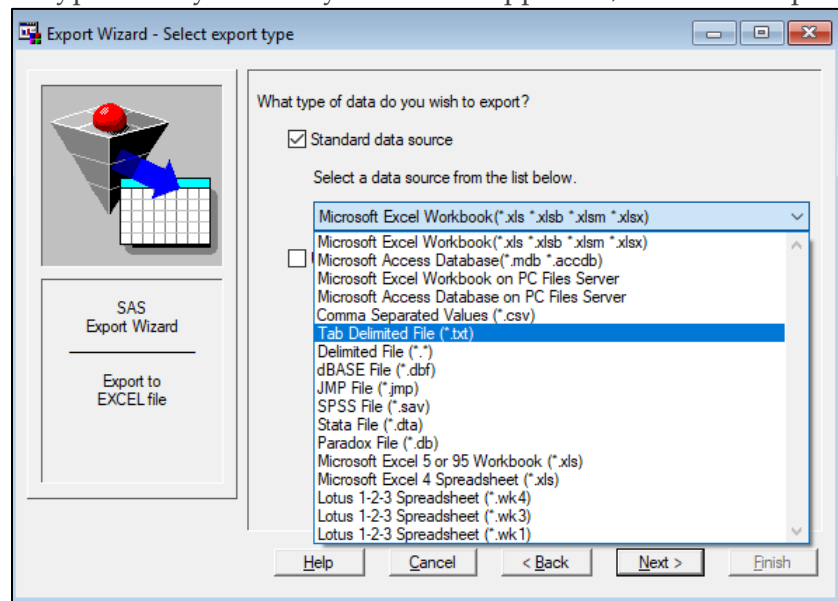

2. Start by Selecting the Library and Member

From the drop downs, select the library your data is located in and select the name of data set.

3. Select the File Type

Now choose what type of file you want your data to appear in, from the drop down list.

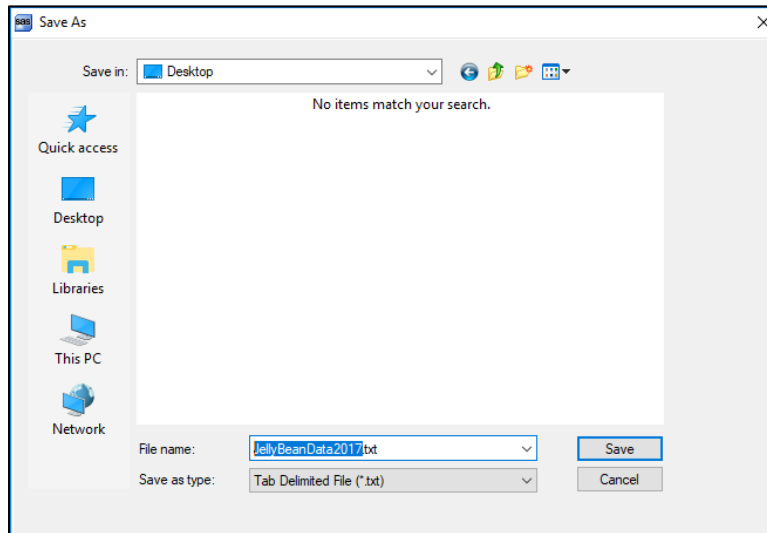

UNIVERSITY of NORTH CAROLINA WILMINGTON

i Certain file files may ask for additional information, for example Excel will ask for a Workbook name, and Access will ask for database IDs and passwords.

4. Choose a Location

Browse to the location where you wish to save your file. Change the asterisk to the name of your new file. Choose to save the file.

i Under options you can choose additional information like, delimiters and first row data.

5. Save an Export Statement?

Use If you would like to save the code for this export, choose where you would like that SAS file to be saved. Change the asterisk in the textbox to the name of your new SAS file. If you do not want to save this code, simply select Finish.

6. View the Log

If your export was successful, you should see the following
